

DAZZLE YOUR WORLD WITH 5 GLITTER DECORATIVE COLOURS! EASY APPLICATION, NO RESIDUE, AND HIGH-QUALITY FINISH!

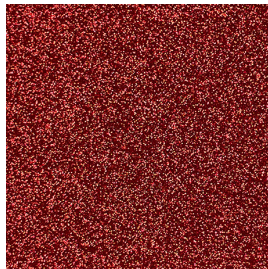

A dazzling self-adhesive decorative film with glitter particles, 350 µm thick and made of PET, offers a sparkling effect. Available in black, gold, silver, red, and green, it enhances smooth surfaces, adding glamour to shop displays, architectural features, and trade fair designs.

Suitable for glass, it has a double-sided colour effect with a slightly reduced glitter on the back. Easy to apply with its transparent carrier film, it features a silicon-coated liner for good lay flat qualities. ASLAN's water-based adhesive system ensures high transparency, excellent colour brilliance, and residue-free removal from glass and metal surfaces.

SPARKLECOLOUR ASLAN SC123 SERIES

Constructions

Face Film	Polyester, coated with glitter	
Thickness	Effect film (PET + liner): ~ 350 µm (~ 13.8 mil) Protection film: ~ 100 µm (~ 3.9 mil)	
Adhesive:	Pressure sensitive polyacrylate	Square quantity: ~ 25 g/m ²
Release liner:	Double-sided PE coated paper	Square weight: ~ 140 g/m ²

Characteristics

Adhesive strength (ASTM D903):	Immediately: after 1 week:	~ 6 N/25mm ~ 14 N/25mm
Temperature:	Applied onto aluminium after 48 hours stored at 70 °C (158 °F) (25 x 25 cm)	No shrinkage measurable
Temperature:	Application temperature: Service temperature range:	Min 15 °C (59 °F) -30 °C (-22 °F) up to +80 °C (176 °F)
