

PRODUCT DATASHEET

Utopia DB 60 Mesh Banner

Utopia DB60 is a matt white, woven mesh banner with an additional backing liner. It provides excellent printability on solvent, eco-solvent and UV inks. DB60 displays bright colours whilst allowing air to flow through the banner. The backing liner stabilises the banner making it sturdier when printing. It is suitable for building wraps, construction sites, outdoor banners, bridges and pedestrian overpasses

Product introduction: Mesh Banner is an open weave printable flexible sign face material. The open structure allows open windflow through the product. It is specifically ideal for building wraps.

Base Fabric: PVC

Base Fabric structure: 1000Dx1000D 9x9

Weight: 340g/sqm(240g/sqm for mesh, 100g/sqm for liner)

Width: 1.02m – 3.20m

Length: 50m/roll

Tear Strength: Warp:300N/5cm; Woof 300N/5cm
