DIGITAL PRINT

Siser Colorprint PU

Polyurethane Heat Transfer Film (Available in Matt and Gloss)

ColorPrint PU is a polyurethane based material which is Oeko-tex and VEGANOK certified. The thin and light material allows for eco solvent and solvent ink printing to create durable vibrant graphics to be cut on all craft cutters. ColorPrint PU can be used on a variety of fabrics, including cotton and spandex. Available in a matt or vivid version, rest assured your designs will pop!

	Roll Size	Sell Unit	1-9m	10-24m	25m+	Roll Price

Siser Hi-5 Print

Polyurethane Heat Transfer Film (Available in Matte and Vivid)

Due to its low temperature and press time, Hi-5 print is suitable for your heat-sensitive fabrics and difficult materials. Specially created for polyester-based fabrics that don't play well with heat, this 120°, 5 second press product will not only open doors to new garment possibilities but it'll also speed up your production time. Hi-5 is Oeko-Tex and VeganOK certified and perfect for Cotton, Polyester and Poly/Cotton Blends. Available in a matt or vivid finish.

	Roll Size	Sell Unit	1-9m	10-24m	25m+	Roll Price

Siser Sublithin Matte Low Temperature

Polyurethane Heat Transfer Film

Sublithin LT film was created to work with solvent, eco solvent and latex based inks. Compatible with all craft cutters, the Oeko-tex certified film has a specially designed polyester backing (barrier) to stop sublimation printed garments bleed into your printed designs. Therefore, you can keep the colour pure on your design you print and cut. Sublithin LT is a low temperature product so only 135 degrees is needed to press on to your project.

	Roll Size	Sell Unit	1-9m	10-24m	25m+	Roll Price
Siser Sublithin Matt Low Temperature	500mm x 25m	Metre	\$21.72	\$19.75	\$17.95	\$448.75

Siser Sublithin Soft Print

Polyurethane Heat Transfer Film

Perfect for Dye Sublimation, the Sublithin Soft has a black blocking back to eliminate any dye migration when the garment is pressed, keeping your prints clean and designs sharp. This product has been specifically formulated for sports garments such as sublimated jerseys and will work with most Eco-Solvent, Solvent and Latex-based inks. Sublithin Soft is approximately 160 microns thick and is not suitable for inkjet, Toner or Sublimation printers

	Roll Size	Sell Unit	1-9m	10-24m	25m+	Roll Price
Siser Sublithin Soft Print	500mm x 25m	Metre	\$22.85	\$20.77	\$18.88	\$472.00

Siser Easy Subli

Thermo Transfer Film

Siser Easy Subli is a thermotransfer film with a plain polyester backing which is designed for sublimation ink printers. Easy Subli grants vibrant colours with a stunning thin design that will allow you to transform cotton fabrics with dye sublimation inks. Suitable for use on Cotton (all colours), white and light coloured polyester and poly/cotton blends, but not treated fabrics.

	Roll Size	Sell Unit	1-9m	10-24m	25m+	Roll Price

Siser DigiBrick

Polyurethane Heat Transfer Film

DigiBrick is a high thickness Heat Transfer Vinyl that is printable with Solvent, Eco-Solvent and UV based inks. It stands a whopping 750 microns (29.52mm) tall and has been designed to complement almost all projects with it's smooth matte finish. DigiBrick especially suits had designs, faux patches, and any colour design that needs some dimension. It's suitable for materials such as Cotton, Polyester and Poly/Cotton Blends.

	Roll Size	Sell Unit	1-9m	10-24m	25m+	Roll Price
Siser Easy Subli	500mm x 25m	Metre	\$30.25	\$27.50	\$25.00	\$625.00
WEBCODE: SISDIGIBRICK						

Siser Soft Print

Heat Transfer Film (Available in Matt and Vivid)

Siser Soft Print Color is 45 micron, super thin, with the stretchiest, soft feel to it. Create amazing images even on dark garments. Printable with solvent and eco solvent inks. Use Siser TTD Easy application tape to transfer the images. Even though the Soft Print Color is very thin, the material grants a high covering power on dark fabrics, with no compromise on colour quality. Available in both matt and vivid finish.

	Roll Size	Sell Unit	1-9m	10-24m	25m+	Roll Price
Siser Soft Print	500mm x 25m	Metre	\$19.92	\$18.11	\$16.46	\$411.50

Siser S-Print

Heat Transfer Film

S-Print is a thin water-based material which allows for low temperature application and a soft touch on your garment. The Oeko-tex and VEGANOK certified film (HTV) can be applied with as little as 120 degrees for 5 to 10 seconds (depending on material weight). Compatible with all craft cutters, simply print your design using an eco solvent, solvent or UV based ink to create a quality garment in minutes.

	Roll Size	Sell Unit	1-9m	10-24m	25m+	Roll Price
Siser S-Print	500mm x 25m	Metre	\$18.48	\$16.80	\$15.27	\$381.75

Siser SparklePrint

Heat Transfer Film

Siser SparklePrint is the perfect digital HTV if you're looking to embellish your designs with some Glitter and sparkle. Different to our standard Siser Glitter the Siser Sparkleprint has specks of glitter that are encapsulated to create a smooth surface without any rough texture which enables a bright shiny finish every time! Sparkleprint is around 190 Microns thick and is compatible with Eco-Solvent, Solvent and Latex ink, it's also Oeko-Tex and VeganOK certified.

	Roll Size	Sell Unit	1-9m	10-24m	25m+	Roll Price

Siser T.T.D Special Application Tape

High Tack Application Tape

The Siser TTD Special Application Tape is a silicone-based, clear application tape with an aerated backing. Its extra tacky adhesive is specifically designed to grip EasySubli HTV, allowing for easy removal from the static backing and exposing the heat-activated adhesive side of the material or garment. It can be heat applied immediately or stored on the mask's aerated backing. Please note that due to the nature of EasySubli prints, TTD Special is intended for single use.

COMPUTER CUT

Siser P.S. Film (EasyWeed)

Semi Gloss Polyurethane Heat Transfer Films

The Siser P.S. Film (Easyweed) is compatible with all craft cutters. The Oeko-tex and VEGANOK certified film (HTV) has a thin finish which allows for direct overlaying with any "Easyweed" product. With the ability to peel hot or cold, the huge array of colours offered and the amazing durability, it is one of the most favourite products available on the market for use with the craft and garment industry.

Siser P.S. Lumen

Glow in the Dark Heat Transfer Films

P.S. Lumen is available in white which glows green in the dark. It cuts and weeds just like our popular EasyWeed Heat Transfer Vinyl and has the same application settings. In order for the glow to take effect you need to 'charge' the material. You do this by exposing it to sunlight, the more sun it gets the brighter it stays for longer. This product is perfect for kids costumes, Halloween, and anything that needs that extra bit of glow!

Siser P.S. Film Extra (EasyWeed Extra)

Polyurethane Heat Transfer Films

The Siser P.S. Film Extra (Easyweed Extra) is compatible with all craft cutters. Specially formulated to work with difficult materials like nylon, leather and silicon treated clothing. The Oeko-tex certified film (HTV) will help you personalise even the toughest of projects. With the option to peel either hot or cold, you can be assured your project will adhere to your garment. Because Extra is part of the Easyweed family, you can confidently layer a design for maximum creativity.

Siser P.S. Film Subli LT (EasyWeed Subli LT)

Polyurethane Heat Transfer Films

PU plotter cut heat seal material with adhesive polyester backing, specifically conceived for low temperature transfers on polyester textiles colored with sublimation inks. The special structure and processing of the material create a barrier to the dyes, preventing the "migration" effect and maintaining thus unaltered the original color.

Siser P.S. Adhesive

500mm Adhesive Carrier

Siser P.S. Adhesive is just like the Siser P.S. range with an adhesive carrier side and a material side. Be sure to remove the pink protective layer before cutting. The Carrier side is much smoother and shinier than the material side. The material side is just a layer of transparent glue, but not just any glue, Siser P.S. Adhesive. This P.S. Adhesive can be used with any screen printing foils as well as fabrics and other materials that lend themselves to adhesion. The cloudy appearance of the P.S. Adhesive turns clear when applied, and can be cut on any Vinyl cutter.

	Roll Size	Sell Unit	1-9m	10-24m	25m+	Roll Price
Siser P.S. Adhesive WEBCODE: SISPSAD500	500mm x 25m	Metre	\$10.56	\$9.60	\$8.73	\$218.25

EQUIPMENT

Siser Juliet Cutter

30cm High-Definition Cutter

Juliet® is a high-definition cutting machine that brings quiet and detailed power to your fingertips. With precision and versatility, it cuts fine details in various materials, including Siser heat transfer vinyl, cardstock, stickers, and craft foam. It accommodates materials up to 12" wide using the included cutting mat, and soon, a custom roll feeder will be available for cutting longer rolls without a mat. Say goodbye to loud motors as Juliet® operates quietly, making it perfect for crafting while enjoying your favorite shows or when the little ones are asleep. Unlock a world of creativity and convenience with Juliet®.

Siser Pillow Box

Set of three: 15cm x 20cm, 12cm x 45cm, 25cm x 30cm

Heat Transfer Pillows have a core of soft foam covered by our non-stick Heat Transfer Cover Sheet material. The thickness of the foam allows you to elevate the working space, keeping unwanted areas away from the heat giving you an even surface for each application. Most commonly used on garments with zippers, buttons, seams, and pockets.
